GREENWOOD VIRGINIA 22943

January 3, 1973

Mr. D. C. Prager, Area Representative
Central Regional Office
P. O. Box 4201, Fort Hill Station
Lynchburg, Virginia 24502

Received from Shipman 1-8-76

Dear Mr. Prager:

We submit herewith application for non-discharge certificate for Greenwood Chemical Company, P. O. Box 26, Greenwood, Virginia 22943.

Greenwood Chemical Company is a manufacturer of fine and organic chemicals and has a limited amount of industrial waste which is channeled into a series of settling basins.

Please advise if additional information is needed.

Yours truly,

Clint Shipman
Vice President - General Manager

GREENWOOD CHEMICAL COMPANY
(VIRGINIA CHARTED CORPORATION)
INFORMATION SUBMITTED

EXHIBIT I General Location Map
EXHIBIT II Detail Location Map and Survey
EXHIBIT III Settling Basin Diagram
EXHIBIT IV Building Details
EXHIBIT V (a)(b) Process Flow Sheets

An unnamed tributary of Stockton Creek crosses the southwestern portion of the property. This is shown on Exhibit II - Detail Location Map and Survey. This tributary is dry except in periods of abundant rainfall.

Greenwood Chemical Company generally operates on a twelve month schedule, five days per week, eight hours per day. Occasionally it is necessary to operate on Saturday.

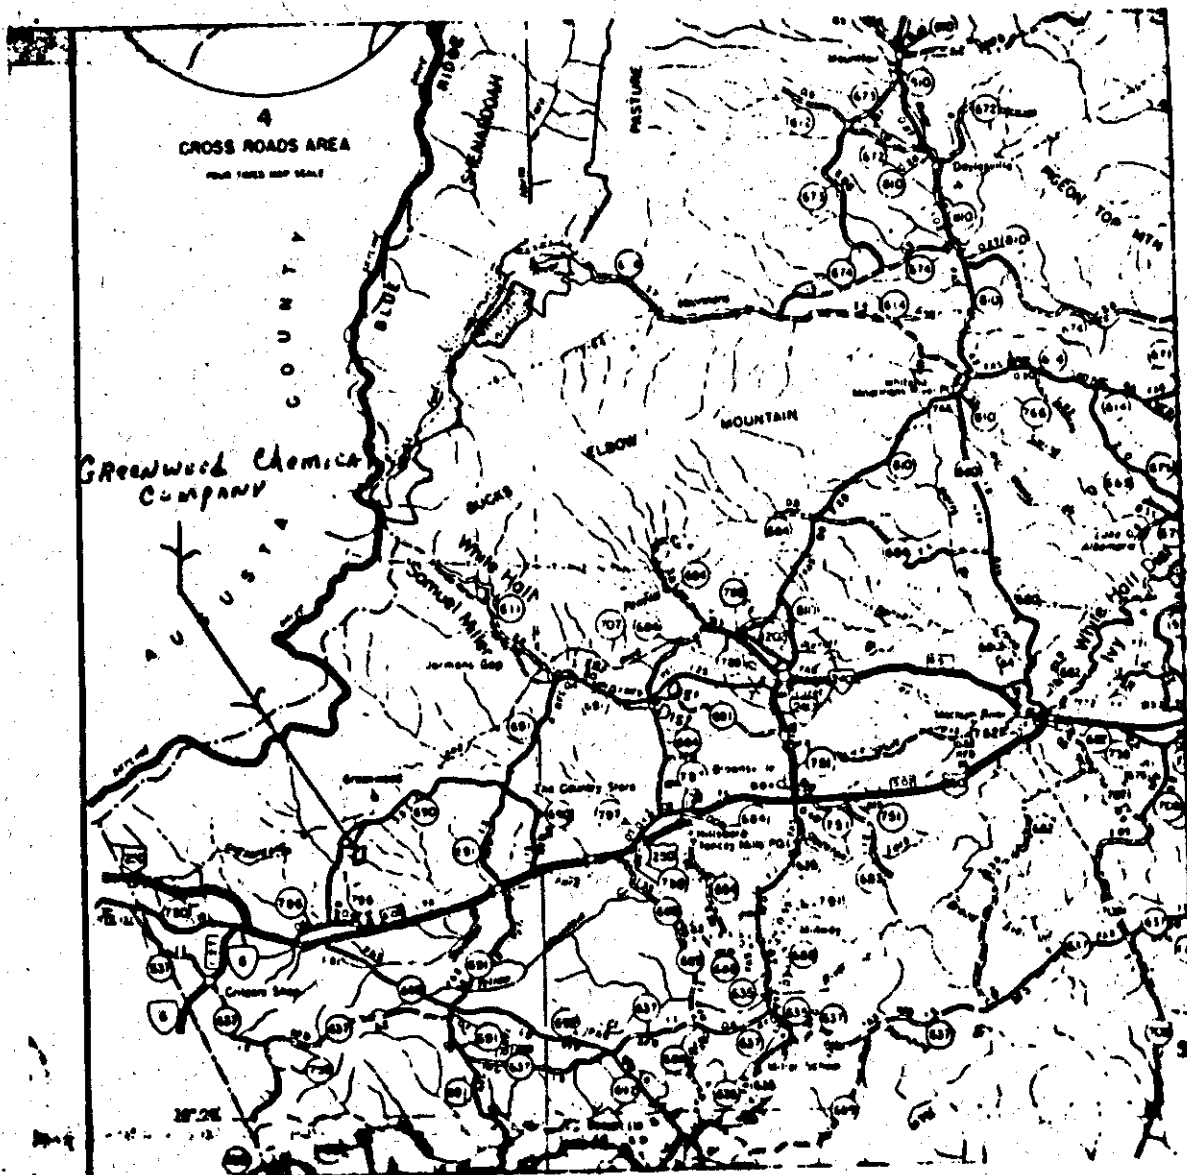

The average number of employees is seven and the maximum number of employees is ten.

Industrial waste is generated mostly in wash water in cleaning reactors between batches and is channeled to the primary basins⁴ shown in Exhibit III. This waste runs approximately 500 gallons

to 1000 gallons daily. There is no effluent stream from the disposal basins. Water is used for cooling jacketed reactors. This water at present is not recovered and is channeled to the clear water basin shown in Exhibit III. As the company develops it is planned to install cooling towers and reuse this water.

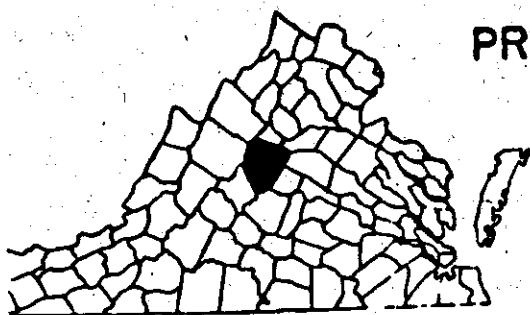

A septic tank approved by the County Health Department is used for employee sewage.
